Software Resources Data Reporting (SRDR)
Proposed Solicitation Statement of Work (SOW) Language

SRDR Instructions

The Government identifies software resources data on the elements identified within the attached CSDR Plan, DD Form 2794. The data for each marked element are contained in the most recently approved versions of the DI-MGMT-81739 and DI-MGMT-81740. The government objective is to collect a subset of the same data that the contractor normally collects to oversee and manage software development efforts. Therefore, the Government expects the contractor to customize or tailor the sample formats to be consistent with data it normally collects. The Government will approve the customized or tailored formats proposed by the contractor. The contractor shall provide a SRDR Data Dictionary with the customized formats.

The contractor shall submit the completed SRDR Initial Developer Report within 60 days after contract award for the entire software product, and within 60 days after initiation of each software release or build. The contractor shall submit a completed SRDR Final Developer Report within 60 days of delivery of each delivered software release. The contractor shall submit a completed SRDR Final Developer Report for the entire software product within 60 days of delivery of the final software element. Report format and other delivery requirements are specified in the attached CDRL.

SRDR Evaluation

The contractor's customized SRDR and Data Dictionary will be evaluated on the extent to which (1) the report captures the Government's stated need and (2) the data provided is integrated with the contractor's normal oversight and management procedures.
